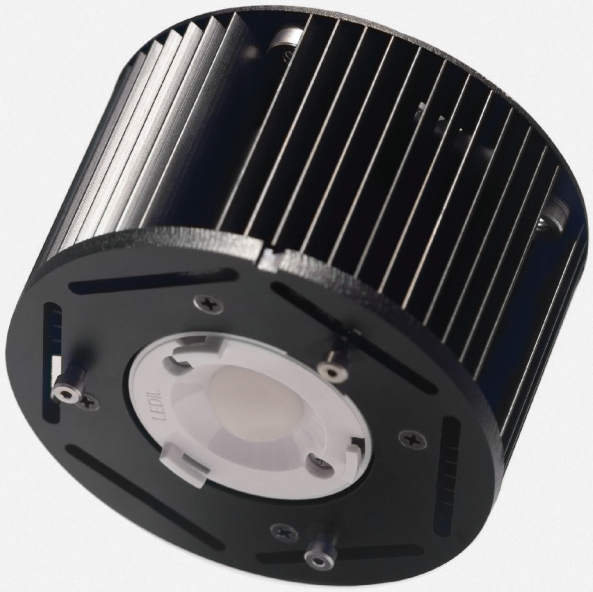
BUMBLE BEE 25-CX

OMNI-COLOR™ LED LIGHT



The Bumble Bee 25-CX™ is Hive Lighting's most portable light. Using just 25 watts to produce light output comparable up to a 150W incandescent. It is 2.5" length and has multiple mounting points for easy rigging to cameras, drones, practicals, stages, and sets. The 25-CX can run off a battery or universal wall power, it weighs just 1 lb, and is compatible with hundreds of light modifying optics.

HIVE LED TECHNOLOGY

The Bumble Bee 25-CX™ uses LED Omni-Color™ technology. By using a combination of primary, secondary and tertiary colored LEDS (Red, Amber, Lime, Cyan and Sapphire) Hive LEDs create a more complete and even spectrum than traditional RGBW. A proprietary algorithm combines the 5 different colors into a brilliant white-balanced light and millions of saturated color combinations. While traditional color changing LEDs use 3 base colors or 2 "white" LEDs , Hive's Bumble Bee 25-CX™ has far higher color quality and far greater control than Bi-Color or RGB LEDs.

INFINITE ACCESSORIES

The Bumble Bee 25-CX™ is a 180 degree flood light with multiple mounting points. Move quickly between Hive's various Fresnels and Reflectors with optional drop in lenses and barndoors. Full sized or mini Leko attachments are perfect for shaping light. The 25-CX's 100mm (4 inch) diameter also accepts all Profoto® accessories and Profoto® adapters for light modifiers from companies like Elinchrom®, Westcott®, Chimera® and many more. The possibilities are almost endless.
